

The background features a dark navy blue field with several large, overlapping, tilted triangles in bright yellow and coral red. These shapes are scattered across the upper and left portions of the frame. At the bottom, a solid yellow band curves upwards from the left edge.

WeldConnect

Keeping Welding Safe

Compliance

WeldConnect expertise is on-site **Welding and Oxy/Fuel Hazard and Risk Assessments**.

Our team of skilled consultants are trained to the highest level to enter your site, assess and test all your Oxy/Fuel and welding equipment plus your environment as per requirements of national acts, regulations, code of practice and relevant Australian standards.

Our working procedure is audited to the highest level which Complies to the:

Quality Management System ISO 9001:2015

— Which assures your business achieves the highest level of safety Standards.

Systematic Hazard Risk Control

How it works

Step 1

Book a WeldConnect consultant

A certified WeldConnect consultant visits your site and collaborates closely with you to establish an appropriate testing assessment routine.

Step 4

Map your business safety requirements

The App also maps your business safety requirements based on all current National Acts, Regulations, Codes of Practice and Australian Standards, guaranteeing the job is completed correctly to the highest safety standard.

Step 2

Consultant commences work on-site

Using our specialised App, the certified consultant carries out the required Oxy/fuel & welding allied processes and equipment testing/environment procedures.

Step 5

Achieve safety compliance

Your consultant will provide you a live report outlining your exact safety position, and on-site walk through to help maintain your safety compliance.

Step 3

We complete a hazard and risk assessment

Our App ensures compliance, following the core requirements of the National Standards "Systematic approach" - Hazard, Risk, Control, Report, Communicate and Review

Step 6

Access your online Report

Our cloud-based App stores all your reports securely and they can be viewed on your smart phone, tablet and PC at any time live through our website.

Supply

WeldConnect is the leading supplier of workshop products across Australia. Our objective is to provide your workshop with quality products through a lean and efficient supply chain. At all times our focus is customer service, which we provide you in a number of different ways.

Customer Service

At WeldConnect, our customers are our number one priority. Our consultants come to you on-site and work with you to ensure you are receiving the best products for your individual needs.

House Keeping

WeldConnect can help with organising your in-store inventory too. We assist with product organisation and **POS** material for your store. We provide a lean and efficient supply chain which is designed to make your life easier.

Ordering

You can order directly through your personal consultant or you can log in to our website and order online. Online ordering allows you to simply add your purchase order and once it's confirmed, we will pack your stock and have it delivered to your door. Our friendly technicians are also on hand to deliver and install.

Login to your own personalised store

When you register your account on our website, we will create you a personal online store with locked in products and prices to make ordering as easy as it can be.

Simple Online Ordering!
